

Best Steel for Best Forks

A1 steel for superior performance

Only the best steel ensures that the fork is able to withstand even the toughest duties. Over decades VETTER has developed steel grades especially designed for the specific needs in the forklift industry. This ensures the toughness, purity, hardness, workability which is absolutely needed – without compromises!

And even better: VETTER is focused on using more and more **GreenSteel** for reducing the carbon footprint – in all our common interest

Top fork steel VQ32+ and high performance steel VQ1300

Toughness: High-tech heat treatment

Efficient application: Tight tolerances and smooth surfaces

VETTER Know-How: The fork professionals since 1964

Highest welding quality, certified acc. to ISO 3834-2

Certified according to ISO 9001 / ISO 14001 / ISO 50001

QUALITÄTSTAHL
VQ32+
QUALITYSTEEL

THE ALL-ROUNDER

- High resistance against abrasion
- Yield strength up to 136,000 PSI Yield Point
- **Up to 12 % higher yield strength compared to standard fork steel**
- Operating temperature -30°C to +100°C
- High dynamic and static load capacity

HOCHLEISTUNGSSTAHL
VQ1300
HIGH-PERFORMANCE STEEL

HEAVY DUTY APPLICATIONS

- High wear resistance
- Yield strength up to 188,000 PSI Yield Point
- **Up to 51 % higher yield strength compared to standard fork steel**
- Operating temperature -40°C to +120°C
- Higher dynamic and static load capacity with the same cross-section, new design options
